DARÍO HERNÁNDEZ

FRONT-END DEVELOPER

ABOUT ME

I consider myself a disciplined, ambitious person, without fear of change, with great capacity for learning and teamwork.

My purpose is to provide facilities to society through the skills I have acquired through study and work within the technological field.

WORK EXPERIENCE

Neoris - Front-End Developer

October 2023 - Currently

Project of the educational sector for the European market (Netherlands and Belgium), consisting of the modernization of teaching methodologies in primary school, relying on new technologies for the development of “interactions” that are divided into two parts, the one used by the teacher and the ones used by the students.

The tasks I perform in the project are:

- Creation of new “interactions”, basing all the development on web components, elaborated with Typescript and Lit Element.
- Converting the ideas of the client and the design team into clean, reusable and scalable code.
- Ensure the correct functioning of the developed code through unit tests, with OpenWC, mocha.js and chai.js.
- Maintain a continuous integration of the development with management tools such as: JIRA, Bitbucket, Git, AWS.
- Work in a team with an agile SAFE methodology.
- Maintain discussions about functionalities, possible improvements and fixes with the client using English as an international language.

Accenture - Front-End Developer

January 2023 - September 2023

Project in the banking market (BBVA), focused on the public web of the entity.

- Development with web components.
- Front-End work: TypeScript with LitElement framework.
- Version control using Git and BitBucket.
- Control tools: Bamboo

September 2021 - December 2022

- Project in the banking market (Inversis).
- Development with web components and microservices.
- JavaScript with Angular.
